

How to Clear Cache in Google Chrome

This article will show how to clear your cache in Google Chrome. Cache is data that is stored to make the browser run faster and more efficiently. Sometimes, clearing this may fix an error that is occurring.

1. Go to Google Chrome. Click the three dots in the top right hand corner.

7. Click "Clear Data".

Note: This may take a couple minutes, especially if you selected one of the longer time ranges.
